MADE IN ITALY

Vaginal Infection

Description

GINOX is a medical device that helps to keep intact the natural defenses of the vagina and facilitates the restoration of vaginal flora; it allows to eliminate the symptoms resulting from an imbalance of hydration and/or of the vaginal pH. For this reason it is useful in the prevention and treatment of vaginal dryness also of mycotic character (candida), as well as in case of irritation, burning and itching.

1 ovule per day, preferably at bedtime, for 5-7 days after the end of the period or as other medical indications.

Therapeutic indications

- Useful for irritation, burning and itching
- Vaginal pH rebalancing
- Moisturizing and lubricating action
