MADE IN ITALY

# Vaginal Bacterial Infection

## Description

**Ginclor ovules** is a medical device that contributes to a rapid restoration of the vaginal environment and it's useful in prevention of bacterial infections and recurrent candidiasis. Containing hyaluronic acid, boric acid and lactic acid, it helps delete the symptoms due to unbalanced vaginal hydration and/or vaginal ph.

Insert 1 ovule/day into the vagina – preferably in the evening before sleeping - for 5-7 days after the end of menstrual cycle or according to medical advice.

## Therapeutic indications

- Moisturizing and lubricating action
- Restoration of the vaginal environment
- Unbalanced vaginal hydration and/or vaginal ph
