## DESCRIPTION

ALIPER KIT is a product ideal for daily nasal hygiene in infants and children.

Allows to atomized the solution in few seconds;

- Not needing electricity or mask;
- It's hygienic: it can be washed and reused;
- Thanks to its small size you can carry it with you;
- His dispenser is made of a soft colored material;
- His shape is specially designed for the child's nostril;

## THERAPEUTIC INDICATIONS

- Cold
- Allergic rhinitis
- Sinusitis
- In all types of nasal congestion

## PRESENTATION

15 single-dose vials of hypertonic solution ready to use  
+ Kit Siringe+Dispenser

## PACKAGE

The package Aliper Kit contains:

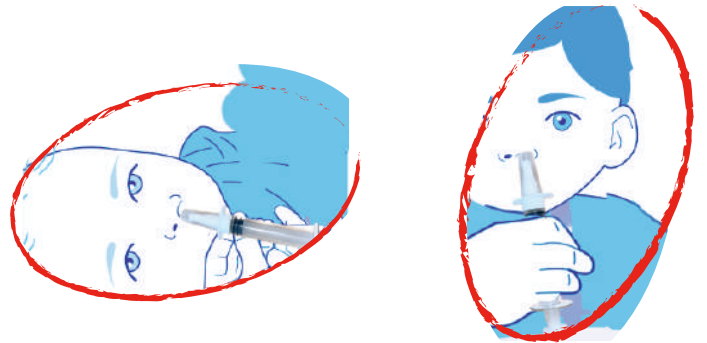

- Aliper , 15 single dose vials of 5ml.  
Each vial of Hyaliper contains: Water, Sodium Chloride, Sodium Phosphate, Sodium hydroxide. Hyaliper 3% doesn't contain preservatives.
- 1 Kit device for nebulization, composed by a nasal dispenser and a syringe of 5 ml.

## How to use it?

**1 -** Connect the vial to syringe included in the package and aspirate the Hyaliper Kit vial solution to be atomized.

**2 -** Secure syringe by inserting it into the syringe's nasal delivery device.

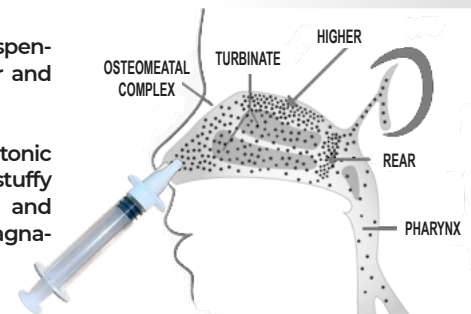

**3 -** In Infants and children.

## PLUS

The atomized solution by dispenser also reaches the upper and back nasal cavities areas.

A deep washing with hypertonic solution helps to clear a stuffy nose improving breathing and preventing the mucus stagnation.

**for each nostril**  
5 ml in 4 seconds
