Allows to atomized the solution in few seconds;

- Not needing electricity or mask;
- It's hygienic: it can be washed and reused;
- Thanks to its small size you can carry it with you;
- His dispenser is made of a soft colored material;
- His shape is specially designed for the child's nostril;

## THERAPEUTIC INDICATIONS

- Cold
- Allergic rhinitis
- Sinusitis
- In all types of nasal congestion

## PRESENTATION

20 single-dose vials of hypertonic solution ready to use  
+ R-Spray Fast

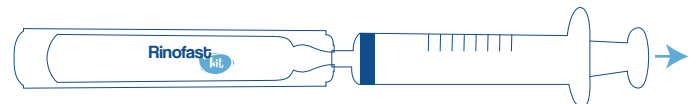

## INGREDIENTS

The package **Rinofast Kit** contains:

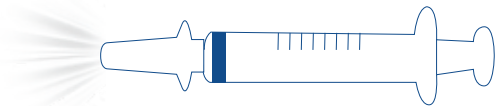

- Rinofast 3%, 20 single dose vials of 5ml. Each vial of Rinofast 3% contains: Water, Sodium Chloride, Sodium Phosphate, Sodium hydroxide. Rinofast 3% doesn't contain preservatives.
- 1 R-Spray Fast, device for nebulization, composed by a nasal dispenser and a syringe of 5 ml.

## How to use it?

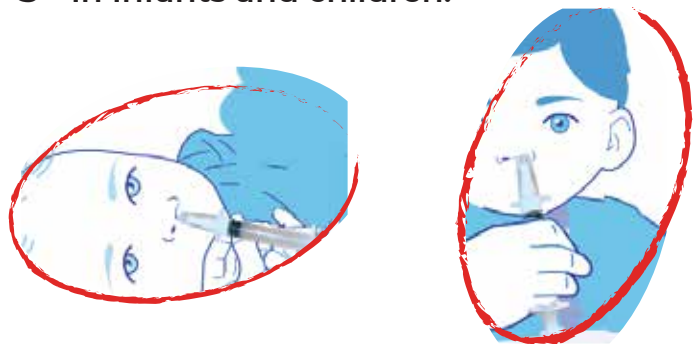

**1 -** Connect the vial to syringe included in the package and aspirate the Rinofast Kit vial solution to be atomized.

**2 -** Secure syringe by inserting it into the syringe's nasal delivery device.

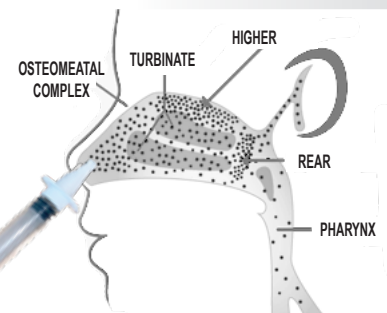

**3 -** In Infants and children.

## PLUS

The atomized solution by dispenser also reaches the upper and back nasal cavities areas.

A deep washing with hypertonic solution helps to clear a stuffy nose improving breathing and preventing the mucus stagnation.

**2s** for each nostril  
5 ml in 4 seconds
