

UROMAG

- Inhibition of kidney stone formation process
- Kidney stone dissolution
- Calcic, Uritic and cystinic calculosis
- Dehydration
- High protein diet

Food Supplement

MADE IN ITALY

DESCRIPTION

Uromag is a food supplement based on potassium citrate. It's indicated to dissolve kidney stones increasing the solubility of uric acid and cystine and inhibiting the various phases of calculus formation (nucleation, aggregation) due to calcium accumulation.

HOW TO USE

It's recommended the intake of 1 sachet a day

THERAPEUTIC INDICATIONS

- *Kidney stones*
- *Calcic calculus*
- *Uratic calculus*
- *Cystinic calculus*
- *Ipokaliemia*
- *Tiredness and fatigue*
- *Dehydration*
- *High protein diet*
- *Increased need or reduced intake with the diet of these nutrients*
- *Physical stress with an abundant sweating*
- *Muscle cramps*

PRESENTATION

Uromag is supplied in a pack of 30 sachets

PLUS

Potassium citrate

- reduce urinary saturation of calcium oxalate (CaOx) and calcium phosphate (CaP).
- inhibit crystallization, growth and aggregation of the lithogenic salts that make up the calculus dissolved in the urine.
- Increases the pH of urine with a pH between 6 - 7 increases the solubility of uric acid by controlling uratic calculus.
- Increasing the pH over 7 increases the solubility of cystine by controlling cystinic calculus.
- Improves the clearance of residual fragments after extracorporeal "shock wave" lithotripsy (ESWL).
