

- Relapsing vagina's fungal and/or bacterial infections
- Treatment of recurrent Candida Albicans symptoms
- Dyspareunia
- Itching and burning

Medical Device

MADE IN ITALY

TREATMENT OF RECURRENT YEAST INFECTIONS

DESCRIPTION

Lattawin gel 1% is a medical device composed by boric acid, hyaluronic acid, lactic acid, and plant extracts. It contributes to a natural recovery of the vagina's bacterial ecosystem. Furthermore, it promotes the creation of a hostile environment against the proliferation of negative bacterial and/or fungus agents, such as *Candida Albicans*, in case of persistent conditions, and it is capable to provide a fresh comfort from irritations.

THERAPEUTIC INDICATIONS

- Reoccurring mycotic and/or bacterial vaginal infections;
- Chronic Candidiasis prevention and/or treatment;
- Sores and burnings;
- Dysuria

PRESENTATION

- Box with 7 single-use applicators of 5ml each.
- Box with 1 multiuse tube of 30ml.
