

FOR ALL SKIN TYPE

- **Atopic skin**
- **Eczema-prone, xerotic, intolerant and particularly reactive and sensitive skin**
- **Dermatitis**

Medical Device

MADE IN ITALY

HORMONAL IMBALANCES

DESCRIPTION

Dilcoil Lipogel is a medical device indicated for all sensitive skin and at any age for the intensive symptomatic treatment of atopic-prone skin, with eczema, xerosis, intolerance, and particularly reactive and sensitive skin.

It is useful in the treatment of acute phases and recurrences of atopic dermatitis, dermatitis in general, eczema, and particularly irritated skin.

Thanks to its particular composition, it is able to restore skin functionality by hydrating, elasticizing, and creating a protective film barrier for the skin. Emollient and soothing, it helps to relieve pain, itching, and burning sensation of the skin.

Apply with circular movements to the affected area at least once a day. Does not require rinsing.

THERAPEUTIC INDICATIONS

- Intensive symptomatic treatment of atopic dermatitis
- Treatment of acute phases of atopic dermatitis
- Skin xerosis
- Dysfunction of the epidermal barrier prevention and treatment of skin lesions
