Soluzione orale / Oral solution
300 ML
con edulcorante / with sweetener

- Increase urinary flow
- Reduce Water retention
- Increase natriuresis
- Antimicrobial effects
- Genito-urinary tract healthy function
- Changes excretion of different ions:
 - Potassium
 - Hydrogen
 - Chlorine
 - Carbonates
 - Uric acid

Food Supplement

MADE IN ITALY

GENITO-URINARY TRACT HEALTHY FUNCTION

DESCRIPTION

Diurin oral solution is based on *Betula Alba L.* extract, *Taraxacum officinale* extract, *Phyllanthus niruri L.* dry. (tannins), *Agropyron repens* extract, *Tanacetum vulgare L.* extract and *Ceterach officinarum I. plv.* It's useful in facilitating the drainage of body fluids and purifying functions of the body, supporting functionality of the urinary tract.

It's recommended to take 10 ml of solution to be diluted in 1 litre of water during the day.

THERAPEUTIC INDICATIONS

- **Water retention**
- **Mild and moderate hypertension**
- **Heart failure**
- **Kidney failure**
- **Nephrotic syndrome**
- **Cirrhosis**
- **Urinary tract infections**
- **Cellulite**
- **Cystitis**
- **Rheumatism**
- **Gout**

PRESENTATION

Diurin is supplied in a bottle of 300 ml.

INGREDIENTS

Betula Alba L. extract, *Taraxacum officinale* extract, *Phyllanthus niruri L.* dry. (tannins), *Agropyron repens* extract, *Tanacetum vulgare L.* extract and *Ceterach officinarum I. plv.*

PLUS

Betulla Alba L. extract

depurative and diuretic action.

Taraxacum Officinal

Purifying, anti-inflammatory and detoxifying properties.

Phyllanthus niruri L. dry. (tannins)

Draining: draining properties that act on the liver, gallbladder and kidneys.

Antimicrobial: phyllanthus acts as a disinfectant and bacteriostatic in case of urinary tract infections, prostatitis, cystitis.

Hypotensive action.

Agropyron repens extract

Antiseptic and anti-inflammatory action on the kidneys and urinary tract.

Against cellulite, oedemas and hypertension.

Hepato-biliary draining agent recommended in detoxifying treatments.

Tanacetum vulgare L. extract

Increase in diuresis and elimination of uric acid.

Useful in the treatment of gout.

Ceterach officinarum I. plv.

Anti-inflammatory and diuretic action.

Eliminate all obstructions that can form in the urinary tract, completely destroying the stones.

Protects and purifies the liver.

Increases urination and is a powerful diuretic (useful in case of renal failure).

Reduces blood pressure.
