 Vaginal Ovules

Composition: An ovule contains: carbamide peroxide, lactic acid, boric acid, 18-beta glycyrrhetic acid, polycarbophyl, semi-synthetic triglycerides.

Description: GINOX Vaginal Ovules is a medical device that helps to keep intact the natural defenses of the vagina and facilitates the restoration of vaginal flora; it allows to eliminate the symptoms resulting from an imbalance of hydration and/or of the vaginal Ph.

Indications: Useful in the prevention and treatment of vaginal dryness **as well as in case of irritation, burning and itching**

Posology: 1 ovule a day, preferably at bedtime, for 5-7 days after the end of the period or as other medical indications.

How to use:

- 1) Wash the private parts thoroughly (preferably with an external and an internal vaginal douche);
- 2) Open the box and, after washing your hands thoroughly, remove a single ovule from its blister;
- 3) Insert gently the ovule into the vagina trying to get deep, preferably in a supine position, preventing accidental spills.

Storage: Store the product tightly closed in a dry place, between 5° and 25°C, protected from light and heat sources.

Side effects: Known hypersensitivity to the components.

Warnings: Keep out of reach of children. Do not swallow. Do not use if package is damaged. Do not use the product after the expiry date. The expiry date refers to unopened and properly stored product. Do not use the product in case of vaginal lesions and wounds. Do not use the product during menstruation. Do not exceed the suggested dosage without medical advice. The use, especially if prolonged, can lead to sensitiveness events. If this is the case, stop the treatment and consult the doctor in order to start a proper therapy. It is important to inform the doctor or the pharmacist of any undesired effects not reported in the insert leaflet. Do not use the product for more than 30 consecutive days.

Precautions on use: During pregnancy, lactation and for children the use of ovules must be limited only if strictly required and under direct control of your doctor. In case of the intact hymen, before using consult your gynecologist to the specific conditions of use. Single-use device: in case of accidental exit of the ovule out of the vagina, do not re-use the ovule.

Presentation: Folding box with 2 blister containing 10 vaginal ovules of 2 g/ovule.
