# EYE CARE

## DESCRIPTION

**ILAVIS GAUZES** is a natural cotton gauze imbibed with

- *Chamomilla Recutita*,
- *Euphrasia officinalis*, and
- *Hyaluronic Acid*

with cleaning, decongestant, soothing, hydrating and protective action.

### How to use it:

**AS IS:** Apply the gauze on the eyelid area. Pass it gently to ensure removal of eye secretions and of external agents (smog, dust, etc.). It is also possible to squeeze the contents of the gauze over the eye and then massage with the gauze until complete removal of residues.

**WARMED:** If secretions are persistent or occlusion of lacrimal canaliculus occurs, heat the closed sachet in warm water (40° C). Use the gauze as a hot-pack for few minutes and then gently massage the area under the gauze.

**COOLED:** In case of phlogosis, cool the closed sachet in the refrigerator for a few hours and then apply the gauze to the eye, keeping it in place for a few minutes as a cold pack and then gently massage the area under the gauze.

## THERAPEUTIC INDICATIONS

- Periocular hygiene
- Daily
- Eye and eyelids dryness
- Exposure to dry-air
- Exposure to pollution and irritants
- Allergy

Even in case of eye discharge

## PRESENTATION

14 sterile disposable gauze in sachets

## REGULATORY STATUS

- PIF
- Free sale certificate
- Cnp registration
- Certificate of origin (at the time of invoicing)
- ISO 13485 certificate
- ISO 9001 certificate
- GMP for cosmetic product

## 3 ways to use ILAVIS

- ✓ Warmed 
- ✓ Cooled 
- ✓ As such

✓ ILAVIS is indicated for application on sensitive areas even in children
