

- Seborrheic skin
- Acne-prone
- Follicular hyperkeratosis
- Superficial folliculitis
- seborrheic dermatitis
- Dull, uneven skin with residual post-acne blemishes

Food Supplement

MADE IN ITALY

SEBORRHEIC SKIN

DESCRIPTION

A latest-generation product useful for combination/oily skin, it helps counteract imperfections, impurities, excess sebum and the "oily" effect.

Such dermatological formulation based on Gluconolactone, Glycolic Acid, Climbazole, Salicylic Acid, Lactic Acid and Vitamin A promotes the cleansing of pores in depth and is highly effective in cases of blackheads, pimples and enlarged pores.

For optimal results, it is necessary to practice the treatment with constancy and precision according to the doctor's prescription.

THERAPEUTIC INDICATIONS

- Smoothing and evening action
- Reduces imperfections and enlarged pores
- Sebum control
- Keratolytic and comedolytic action
- Post-acne therapy support
- High skin tolerability
