# ATOPIC SKIN

## DESCRIPTION

Dilcoil dermal oil is suitable for the protection and hygiene of delicate and sensitive skin. Useful for atopic and unspecific dermatitis. Dilcoil dermal oil creates a lipid barrier that protects the skin from external agents.

Moisturizing, emollient and soothing, it nourishes, softens and protects the skin, even the most particularly dry and sensitive by re-balancing the normal physiology of hydrolipidic film.

*Pour the product into the water and stir until obtaining a milky non foaming solution.*

*Apply the product on the already wet skin, gently massaging it, then rinse.*

*Apply the product to slightly damp skin and massage gently.*

## THERAPEUTIC INDICATIONS

- Create a protective barrier against external agents.
- Rebalance the normal physiology of the hydrolipid film.
- Daily cleansing and protection of fragile skin (adults, children and the elderly).
- Pregnancy and lactation (e.g., to prevent and relieve skin dryness).
- Skin hydration in patients undergoing drug therapies that cause skin dryness or sensitization (e.g., cancer treatments, isotretinoin).
- Daily hygiene in individuals with dehydrated skin or at risk of fissures and fissures.
