About Us

● 2008 | FOUNDATION

The company was established as a specialized consultancy firm providing strategic regulatory and technical guidance for the medical device industry.

● 2009 | STRATEGIC EVOLUTION

In response to evolving market demands, the company pivoted to a comprehensive design and brokerage model, specializing in the manufacturing of medical devices, cosmetics, and food supplements.

- **Manufacturing Excellence:** CEO Daniele Scetta spearheaded the design and construction of the Sinergie Farmaceutiche production facility. This state-of-the-art site, dedicated to dietary supplements, cosmetics, and medical devices, was developed in strategic partnership with his second major client, Stewart Italia.

● 2011 | QUALITY ASSURANCE & COMPLIANCE

GFI and Sinergie Farmaceutiche achieved significant milestones in quality management, obtaining ISO 9001 and ISO 13485 certifications, reinforcing our commitment to international regulatory standards.

- **2018 | INFRASTRUCTURE & STRATEGIC INVESTMENT**
 - **Teverola Facility:** GFI commissioned the Teverola (Caserta) manufacturing plant, featuring two specialized production lines for liquid cosmetics, dietary supplements, and medical devices.
 - **Equity Acquisition:** GFI acquired a 5% stake in Pharmintek, a leader in the production of solid-dose food supplements.
- **2021 | CLINICAL RESEARCH & REGULATORY COMPLIANCE**
 - **Clinical Milestones:** GFI successfully concluded four observational clinical trials and initiated its first interventional clinical study focused on neonatal care.
 - The Teverola manufacturing site has obtained GMP (Good Manufacturing Practice) Food certification, formally issued by the competent Local Health Authority (ASL)
- **2026 | SCALABILITY & GROWTH**
 - **Facility Expansion:** GFI has completed the implementation of five new operational departments at the Teverola site.

Our Vision

At Gruppo Farmaimpresa, we believe that an unwavering commitment to excellence is the cornerstone of success. We foster a culture of collaborative innovation, where the synergy of visionary ideas and strategic projects serves as the fundamental driver for continuous improvement and sustainable growth.

HO

Our Services

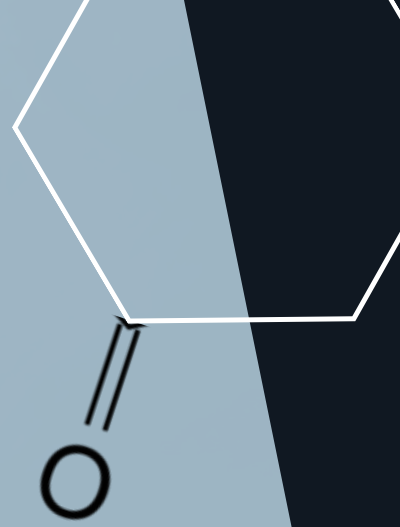

Ready to Market Products

PJ PHARMA is our line of clinically validated finished products. Our healthcare portfolio includes Substance-based Medical Devices, Food Supplements, and Dermocosmetics, all commercially available for immediate market entry under our proprietary brand.

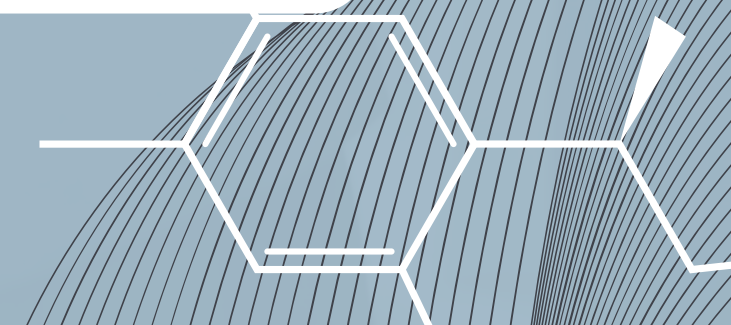

Our Services

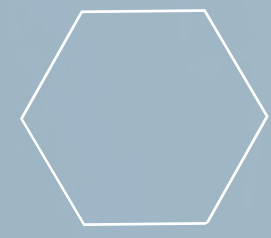

ARMONITA[®]

Ready to Market Products

Armonita represents our premium Ready-to-Market line dedicated to high-end Aesthetic Medicine and Luxury Cosmetics. The range features advanced formulations designed for professional excellence, combining sophisticated sensory profiles with rigorous scientific efficacy.

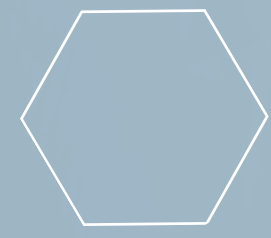

Our Services

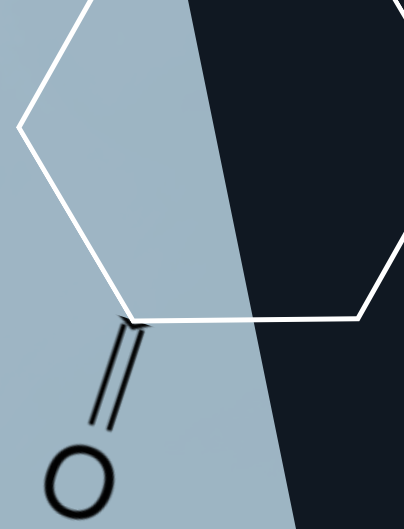

Private Label

Our ready-to-market product portfolio, fully customizable under your own brand.

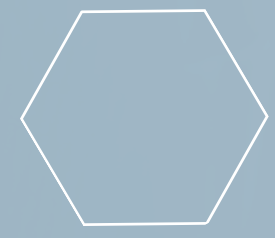

Our Services

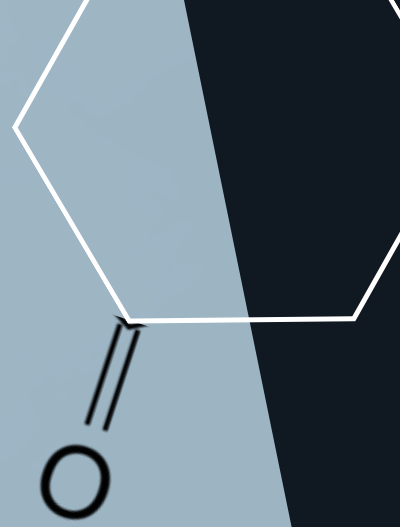

Contract Manufacturing

Tailor-made manufacturing solutions designed to meet your specific technical and commercial requirements.

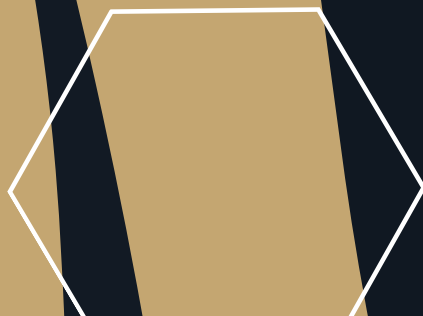

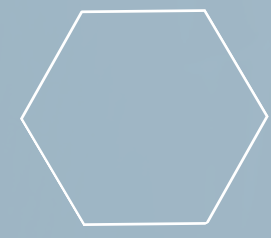

Our Services

Development of New Products

Continuous innovation with over 100 new formulations developed annually.

Our Services

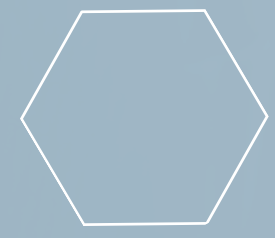

Regulatory Affairs

Product Registration and Market Access in International Territories

We facilitate Marketing Authorization and post-approval maintenance, ensuring compliant dossier compilation and direct liaison with National Competent Authorities to streamline the regulatory pathway

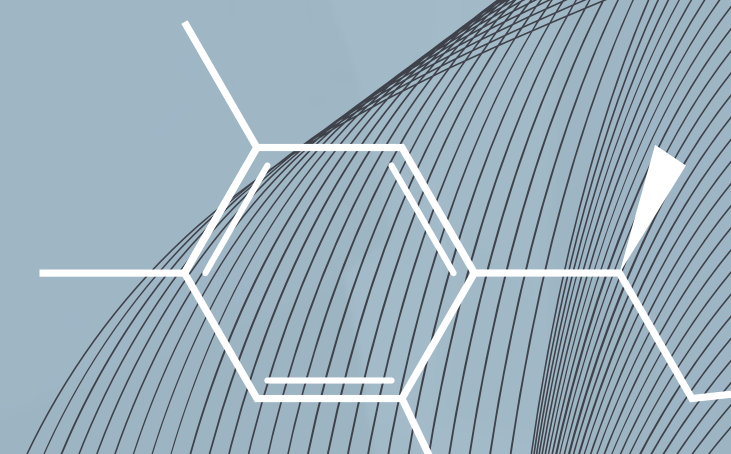

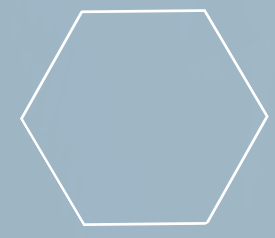

Our Services

Dossier development

We offer ready-to-use dossiers for our entire product portfolio and provide customized technical documentation tailored to your specific formulations.

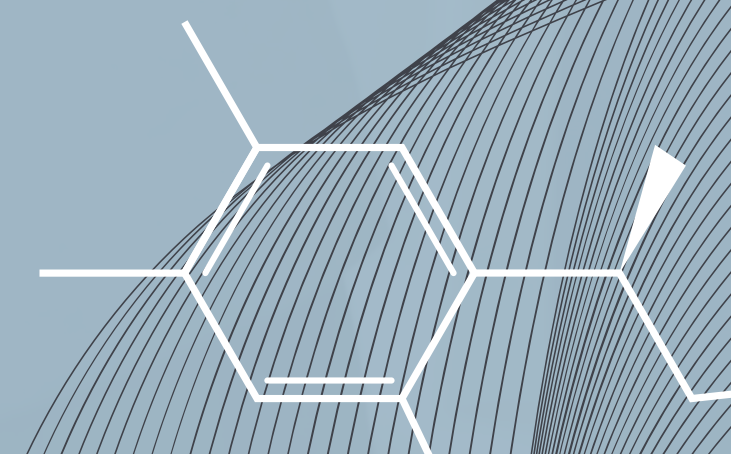

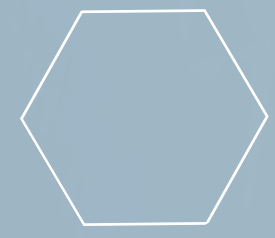

Our Services

Data and Clinical Evidence

We deliver evidence-based efficacy and safety data derived from extensive clinical experience and GCP-compliant clinical trials, supporting the scientific rationale of your products.

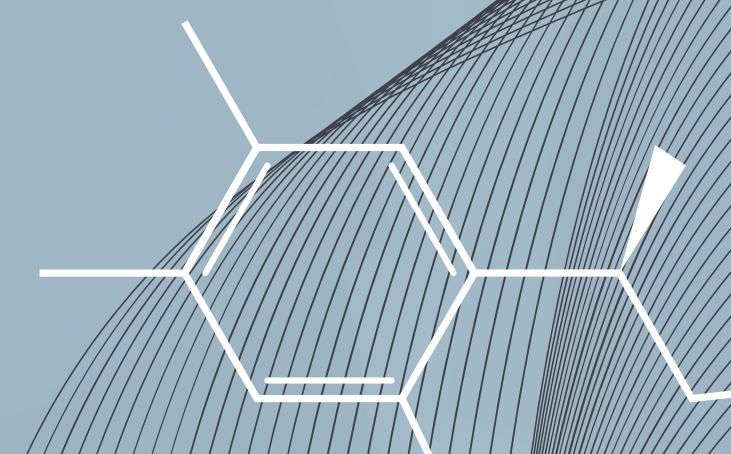

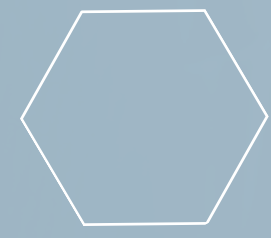

Our Services

Consulting and Certification

We provide high-level strategic consultancy on critical commercialization pathways, empowering clients to navigate complex international regulatory frameworks and achieve seamless market compliance.

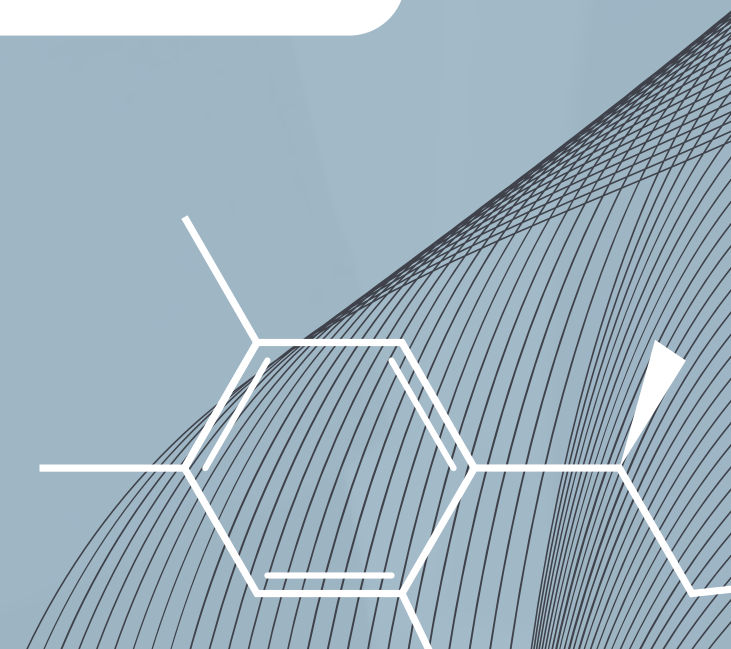

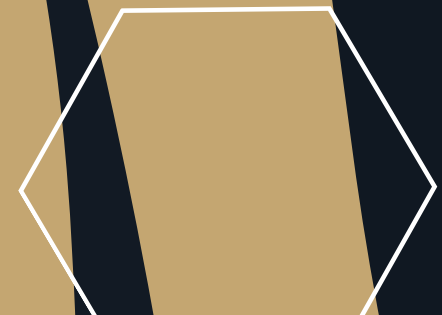

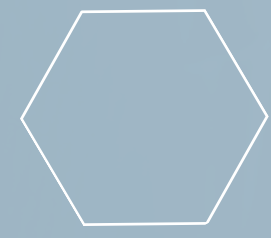

Our Services

Marketing support

We assist clients throughout the product launch phase, from the provision of specialized marketing dossiers to technical sales force training, ensuring effective market penetration.

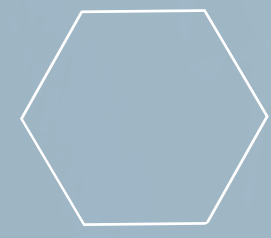

Our Services

Graphic Design

We engineer and implement bespoke visual communication strategies for your brand, ensuring that all product packaging and promotional materials align with regulatory labeling requirements and corporate identity.

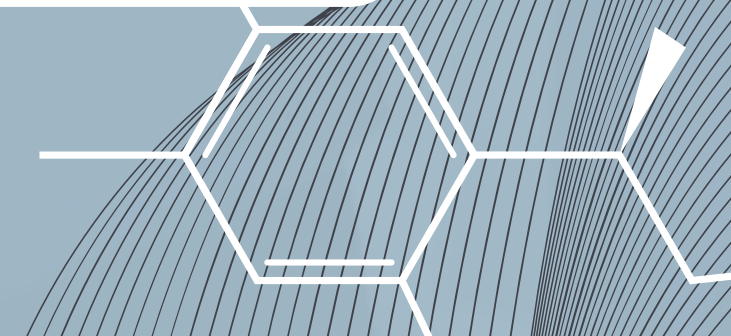

Our Services

OH

Intellectual Property Management

We maintain a robust portfolio of registered trademarks and hold exclusive patents for our innovative formulations, ensuring legal protection and competitive advantage for our partners.

OUR TECHNOLOGIES

Compreezer®

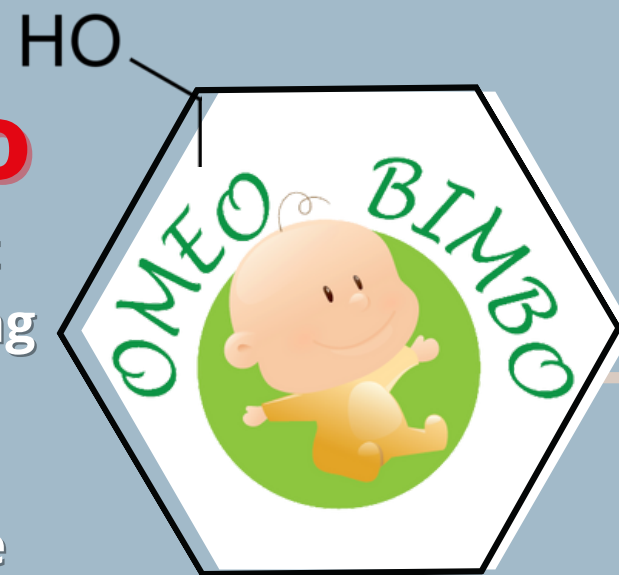

Advanced stabilization technology designed to preserve thermosensitive active ingredients (lipids, vitamins, and probiotics) by mitigating thermal degradation.

OH

Omeo Bimbo

Formulations strictly compliant with Reg. (EC) 1333/2008 regarding food additives for infants and young children, ensuring the highest safety standards for the pediatric population.

HO

HO

Microemulsified ingredients

Implementing microemulsion systems to protect active principles within the gastrointestinal tract and significantly enhance systemic bioavailability (e.g., Iron).

Food Emulsions

Engineered to enhance the solubility of water-insoluble PI, effectively masking unpleasant organoleptic profiles and maximizing bioavailability to ensure superior patient compliance.

O

OUR TECHNOLOGIES

PhysioRelease

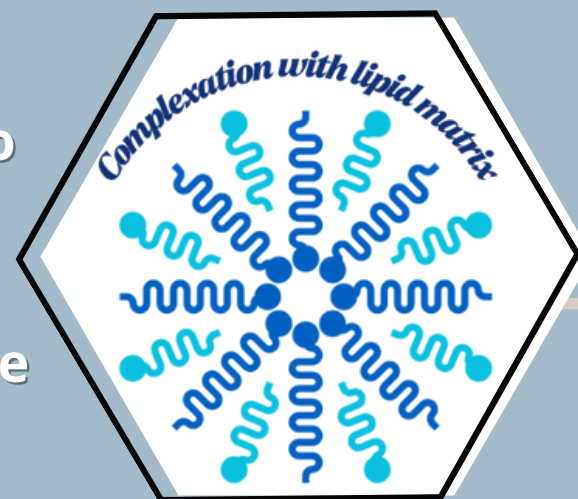

Targeted delivery system engineered for the site-specific release of PI in the small intestine, optimizing the absorption of ingredients with a short biological half-life.

OH

Complexation with lipid matrix

Technological integration of PI into lipid matrices to grant gastroresistance, improve water solubility, and modulate the release kinetics within the GI tract.

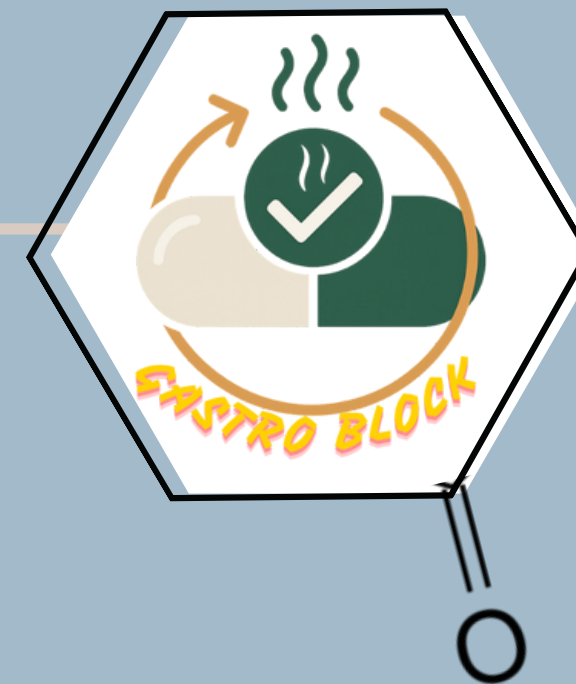

Procap Drops | Spray

Advanced stabilization for liquid formulations, enhancing the vitality of contact-sensitive PI by preventing premature oxidation or hydrolysis without the use of preservatives.

GastroBlock

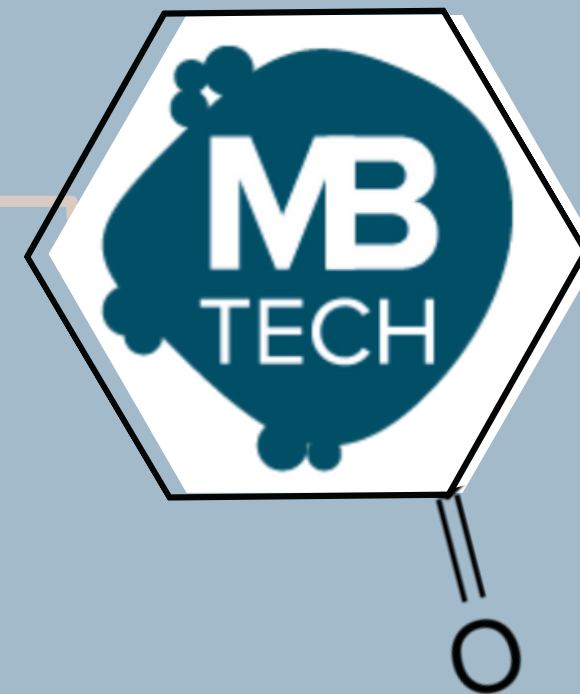

Adds an external enteric film to already enteric capsules, creating a double barrier that locks in odor-causing volatiles until intestinal release.

OUR TECHNOLOGIES

Hypersolv

Enhances the water dispersion of non-hydrosoluble ingredients while increasing the buccal absorption of orodispersible powders.

Mucoadhesive Bioenhancer

Improves the bioavailability and efficacy of active ingredients administered via the oral mucosa, ensuring faster absorption while simultaneously reducing systemic side effects.
